

Please reject petition 04-160. I personally find XM radio to be of much more value than local radio stations that are nothing more than the voice of a preprogrammed large corporation. There is no real local commercial radio anymore. Here in the west XM provides very valuable service that I pay for. If "local" broadcasters were meeting my needs I wouldn't be paying for special hardware and subscription fees. Instead of complining and wanting special treatment perhaps they shpould take note and change with what the listener wants, not what a programmer three thousand miles away thinks I should be hearing.
